# ART & PERFORMANCE

**"Störgeräusche"** is an interactive performance by hannsjana about the feminist potential of acoustic interference, media and sturgeons. The title implies a play on words, as Störgeräusche in German could mean both "interference noise", as well as refer to the sounds of sturgeons (a species of fish). The performance was originally created as an audiowalk in Berlin's Museum for Communication, but due to the pandemic it was adapted to be performed in a digital meeting via Zoom. In the Zoom meeting, the audience could learn more about hannsjana's artistic practice, if it was not for constant interruptions and interference...

The performance will be in German. Please kindly switch on your camera and prepare a large towel. -> Watch Trailer -> performance, June 2nd, 7pm

The strong and expressive voices of **3Women**, Jeannine Mayani, Gonza and Bona Ngoumou, as different as they are, merge into a unity and resonate for a long time in the ears of the listeners. They accompany themselves with delicate guitar or udu-tones. Their own compositions and newly arranged covers are unique. They sing in different languages, the lyrics are sophisticated and inspire to dream or to think.

The concert will take place via the conference' Zoom-Link, June 3rd, 7pm.
